

DIPLOMA | Production & Operations Management

By London City University

Course Overview

The production operations management program provides the participants with perceptions, techniques and devices to plan, analyze, develop core operational capabilities and execute them to various application domains and trades. It focuses on improving decision making capability in business. Production control, descriptive statistics, quality control and revenue management, etc. are some topics covered in this module. The participants can develop a deeper understanding about production operations and associated challenges.
